### D.I.Y. system

The D.I.Y insect screen for windows and doors, easy to be installed, longlasting and guaranteed 5 years!

Derived directly from the technology of the "Professional" Suncover Insect Screen, Eurokit joins to the components solidity and the extruded aluminium thicknesses, the new original Suncover advantages:

- care in coating, anodizing and plastic components;
- adaptation to the window light with a minimum overall dimension;
- easy and perfect cut and installation of the profiles, thanks to the components fitting to the window light imperfections;
- impurescible and self-cleaning fabric with a higher standard compared to the major part of the competitors fabrics.

One touch central release system.

Segreta System : designed as built-in functions to the windows

- All profiles in extruded aluminium designed by Suncover available in various anodized, coated and wooden colours and on request (Ral colours range)
- Reveal, top and face installation, suitable also for large sizes (eg. balconies and terraces).
- Double adjustable guides - Suncover patent - for a perfect fabric sliding, also in case of non-square windows.
- Cassettes which can be opened for maintenance of blind panels and mechanisms.
- Brushes supplied with profiles to seal the blind and automatically clean the blind panel.
- Panel reinforced at the sides with seals and brass studs, and non-rotting, fire-retardant, washable.
- System which can be adapted to all types of buildings and doors and windows.
- Mechanisms guaranteed 10 years.
- Central "one-touch" control handle with raised position for ledges with reduced space.
- Remote controls and automation with central units.
